## HILTON CONNECTED
ROOM THERMOSTAT

Premium **Amana** Brand Quality

EDEN™ DS02G-H

HILTON CONNECTED ROOM THERMOSTAT

KEY COMPONENTS OF THE EDEN CONNECTED ROOM

- **Flexible mounting options:** Install with the optional backplate for a traditional installation process or install flush mount for the thinnest Hilton Connect Room experience in the market

- **OTA (Over-The-Air) capable:** The DS02G-H is the first thermostat approved by Hilton to allow over-the-air firmware upgrades through the Hilton Connected Room system

- 3.1" LCD backlit LCD with over 1" character heights

- **Occupancy and humidity sensing:** Features a flush mounted PIR for sensing room occupancy and integrated humidity sensor

- **Unoccupied temperature setpoints:** Control the unoccupied room temperature when in heating or cooling mode to save energy and money

- Temperature limiting

- Connects to HVAC unit using standard thermostat wiring

The Eden DS02G-H Hilton Connected Room Thermostat allows hoteliers to provide the best possible experience to their guests. The thermostat is Hilton Connected Room approved and will integrate seamlessly allowing guests to control in-room comfort levels directly from their Hilton Honors mobile app.

Eden's Over-The-Air firmware update capabilities mean that your thermostat will always have the most recent firmware revision without having to go room-to-room to manually update the system. Our innovative removable mounting plate allows the thermostat to be installed partially recessed, only 0.61" exposed depth, making it the thinnest Hilton Connected Room compatible thermostat in the industry.
