

The BV Series Threaded Industrial Ball Valve product line is ideally suited to high temperature and high pressure water or steam as well as a wide range of heavy commercial HVAC control applications. These valves provide exceptional characterized control, high rangeability, flow capacity and pressure drops; all with bi-directional bubble tight shut off. Valves in this range feature investment cast 3 piece construction, Carbon Steel housings and Stainless Steel balls and stems with NPT threaded connections. Characterized V-Balls and full port versions provide multiple Cv values in each size.

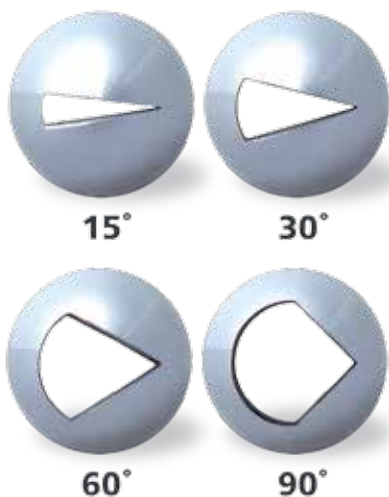

Features and Benefits

- **High Cycle Packing Design**
Years of trouble free service
- **Bubble Tight Shut-Off with Zero Leakage**
Energy efficient
- **3-Piece Body Design**
Allows in-line servicing
- **Phosphate Coated Carbon Steel Bodies**
For cost effective applications up to 1,000 psi at 225°F
- **Available Commercial Grade & NEMA 4 Actuators**
Reliable, cost effective control

Increased Linear Response

Due to the in-line design inherent with characterized control ball valves, line media flows linearly through the piping system. The direct pattern provides increased media control and rapid response times to controller commands.

Flow Curve Chart

These curves of standard ports are general guidelines and are not specific to any particular valve size.

BV - Specifications

Technical Specifications - BV Threaded Industrial Ball Valve , 1/2" - 4" - 2-Way

Carbon Steel Body		V-Port	Full-Port
Service		Chilled/Hot Water, 50/50 Glycol Solutions and Saturated Steam	
Size		1/2" to 4" Threaded Valves, 2-Way	
Maximum Fluid Temperature	Water	-20° to 225°F at 1000 PSI (-28° to 107°C at 6,895 kPa)	
	Steam	100 PSI (689 kPa)	
Valve Body Pressure Rating		1000 PSI (6895 kPa)	
Maximum Close-Off Pressure		300 PSI (2,068 kPa)* For higher close-offs contact Bray.	
Maximum Recommended Pressure Drop	Water	80 PSI (551 kPa)	
	Steam	50 PSI (344 kPa)	
Flow Characteristic	V15 Port	Linear	NA
	V30 Port	Modified Equal Percentage	NA
	V60 & 90 Port	Equal Percentage	NA
Rangeability		200:1	
Leakage		Bubble Tight per API 598	
End Connections		Threaded NPT	
Ambient Operating Temperature Range		See Actuator Rating (Optional high temperature mounting kit may be required)	
Materials	Body	WCB Carbon Steel	
	Ball & Stem	316 Stainless Steel	
	Seat	Tek-Fil	RPTFE
	Stem Seal/Packing	RPTFE	
	Body Seal	TFM	
	Body Bolts	SS304	

Disclaimer - The performance specifications are nominal and conform to acceptable industry standards. For application at conditions beyond these specifications, consult the local Bray office. Bray, Inc. shall not be liable for damages resulting from misapplication or misuse of its products.

BV - Piping Diagram

- "V-Port valves- Note the arrow engraved on the ends which shows the flow going from the bolt head to the nut so that the V-ball is downstream.
- "Full Port valves are bi-directional.

Media Flow entering valve from left. Installing the V downstream is preferred.

BV - For Steam Applications

Install valve with stem at 45° to 90° from vertical.

BV - Mode of Actuation

Typical Two-Way Ball Valve Application

BV - Cut Away View

Ball (A) Is a precision machined and mirror finished for bubble-tight shut off with less operating torque. Ball edges have machined curvatures to reduce seat wear and provide a high cycle life.

Body (B) Valve bodies are investment cast and solution annealed/normalized for the highest quality and added strength. Body castings are marked with a foundry heat number for full traceability. Carbon steel bodies are phosphate coated for increased corrosion resistance.

Seat (C) The seat design ensures bi-directional, bubble-tight sealing while providing the lowest possible torque. This seat design reduces friction, minimizes seat wear and reduces operating torque.

Double Lock Nut Design (D) These double lock nuts allow handles to be easily and safely removed while the valve is under full line pressure.

Live-Loaded Stem Seals (E) The live-loaded seals considerably increase the number of cycles between maintenance adjustments.

Body Bolts (F) Standard material is 304 Stainless Steel.

Body Hinges (G) Heavy duty hinges, throughout the entire size range, provide positive alignment of body to end connection during swing-out, in-line servicing.

End Connections (H) Full range of interchangeable connections. Anti-Static Protection BV Series valves feature anti-static grounding devices as standard. These devices ensure electrical continuity between valve ball, stem and body, thus eliminating the possibility of static electrical charges creating sparks within the valve.

Smart Stem

Valve Sizes 1/2" through 2-1/2"

These Interchangeable series of valves feature strong, large diameter stems with live-loaded, self-adjusting sealing utilizing belleville washers which automatically adjust to compensate for changes in temperature and wear. Manual adjustments which can cause damage to the seal and seat are not required. The assembly is secured by a saddle-type lock washer which prevents stem nuts from un-threading in high cycle automation applications.

Stem Packing

An adjustable V-ring design creates a multiple seal between the stem and body. Each stem assembly is composed of three or four (dependent on valve size) rings providing a very high cycle life by resisting creep and cold flow. The Thrust Washer and the Thrust Washer Protector combine to provide a primary seal, reduce torque and prevent galling. This arrangement is a BV Series exclusive.

V-port ball valves are controllable between 20% and 80% of full open.
 * Full Port Valves
 For steam applications, install valve with stem at 45° to 90° from vertical.
