## Wiring: (Cable)

## MPORTANT:

Do not install multiple VAS-27 Series Actuators connected to the same mechanical load. Master-Slave application of VAS-27 Series Actuators requires that each actuator be connected to independent loads.

(-A) Auxiliary Switches

NOTE: WARNING: All VAS-27 Series actuators are designed for use only in conjunction with operating controls. Where an operating control failure would result in personal injury and/or loss of property, it is the responsibility of the installer to add safety devices or alarm systems that protect against, and/or warn of, control failure.

The performance specifications are nominal and conform to acceptable industry standards. For application at conditions beyond these specifications, consult the nearest Bray office. Bray controls shall not be liable for damages resulting from misapplication or misuse of its products.
