UH SERIES SPECIFICATIONS

VOLTAGE:

- 120/60Hz. VAC (primary).
- 24 VAC (thermostatic).
- Single phase.

MANIFOLD PRESSURE:

- Natural gas 3.5" W.C.
- Propane gas 10.0" W.C.

INLET PRESSURE:

- Natural gas: 5.0 to 14.0" W.C.
- Propane gas :11.0 to 14.0" W.C.

GAS CONNECTION:

- 1/2" N.P.T.
- Field connect to valve.

VENT & INLET CONNECTION:

- Category I or III venting.
- Rear, horizontal discharge/inlet.
- 3" to 4" inlet adapter included.

MOUNTING:

- Four (4) suspension points.
- Slotted mounting brackets accommodate joists on 16 or 24 inch centers.
- 180° mounting.

OTHER:

- Finger-proof fan guards standard.
- External indicator lights.
- External thermostatic connection.

- Approved for elevations 0 - 2,000 ft. without modifications.
- Supplied standard as separated combustion.

CERTIFICATIONS:

- ANSI Z83.8/CSA 2.6.
- Commercial & industrial use.
- Residential use.
- Indoor use only.

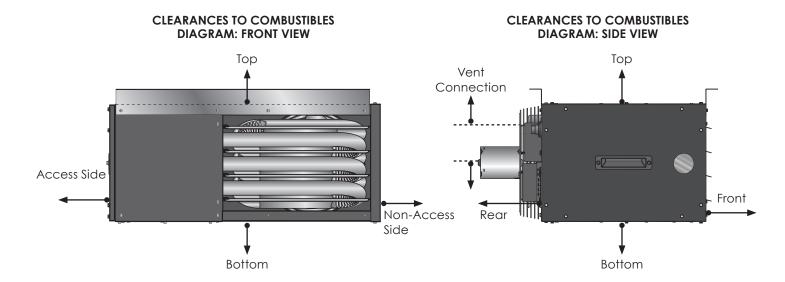

LIMITED WARRANTY:

- 1 year Components
- 5 years Heat exchangers
- 10 years Burners

MODEL	FLA AMPS	MOTOR TYPE	MOTOR HP	FAN DIAMETER	AXIAL FAN ROTATION	GAS CONNECTION	INLET & VENT CONNECTION
UH-30	2.7	SP	1/15	10 in.	CCW	1/2" NPT	3" O.D.
UH-45	2.7	SP	1/15	10 in.	CCW	1/2'' NPT	3" O.D.
UH-60	4.0	PSC	1/12	14 in.	CCW	1/2" NPT	4" O.D.
UH-75	4.0	PSC	1/12	14 in.	CCW	1/2" NPT	4" O.D.

²Consult heater Installation, Operation, Parts and Maintenance Manual for conversion kit reference and instructions.

OPTIONAL ACCESSORIES

QTY.	PART #	DESCRIPTION
	CVK-3	3" Concentric Vent Kit for use when venting and combustion air is desired through a single wall or roof penetration. For use with UH-30 and UH-45 models. No vent pipe or B-vent material is included.
	CVK-4	4" Concentric Vent Kit for use when venting and combustion air is desired through a single wall or roof penetration. For use with UH-60 and UH-75. No vent pipe or B-vent material is included.
	4-DSK	4" Duravent sidewall vent kit. For use with FA-100 and FA-125 models. Includes sidewall vent cap and wall thimble. No vent pipe material is included. 29" long when fully assembled.
	6-DSK	6" Duravent sidewall vent kit. For use with FA-150 through FA-250 models. Includes sidewall vent cap, 18" of double wall B-vent and wall thimble. No vent pipe material is included. 30" long when fully assembled.
	RTVP-4	4" in. roof top vent/intake package for use with FA-100 and FA-125 models. Complete kit for vertical venting through the roof. Includes rooftop vent cap, draft hood connector, fire stop, adjustable roof flashing, storm collar, 90° vent elbow and tube of high temperature sealant. Vent and B-vent must be ordered separately.
	RTVP-6	6" Roof top vent/intake kit. 6" Version of RTVP-4. For use with FA-150 through FA-250 models.
	SWD-4	4" Duravent sidewall vent cap. All aluminum construction. Diameter is 8-3/4 in.
	SWD-6	6" Duravent sidewall vent cap. All aluminum construction. Diameter is 10.5 in.

WRITTEN SPECIFICATIONS

SECTION 235533.16 – GAS-FIRED UNIT HEATERS. SEPARATED COMBUSTION OR POWER VENTED.

Products:

- 1. Gas-fired unit heaters. Separated combustion or power vented.
 - A. Basis-of-design product: Subject to compliance with requirements, provide Detroit Radiant Products Company; model **UH Series**:
 - 1. Reznor/Thomas & Betts Corporation.
 - 2. Enerco
 - 3. <Insert manufacturer's name.>
 - B. Fuel type: burner shall be designed for [natural] [propane] gas having characteristics same as those of gas available at project site.
 - C. Unit Casing:
 - 1. The unit heater(s) casing shall be constructed of not less than 20 gauge aluminized steel.
 - 2. The unit shall be furnished with air deflectors blades. 304 series brushed stainless steel.
 - 3. The deflectors blades are adjustable to provide for directional airflow (up or down).
 - D. Furnace Section:
 - 1. The tubular heat exchanger shall be constructed of a minimum of 18 gauge aluminized steel tubes.
 - 2. The thermal efficiency of the unit shall be above 80%.
 - 3. The burner(s) shall be in-shot type, firing directly into each heat exchanger tube individually.
 - E. Ignition System: direct spark igniter with flame rod sensing capabilities.
 - 1. Single-stage gas controls with a single-stage combination gas control.
 - F. Burner Safety Controls:
 - 1. Heater controls shall include a safety differential pressure switch to monitor combustion air flow, as to provide complete burner shutdown due to insufficient combustion air or flue blockage.

- 2. The heater shall incorporate a self-diagnostic ignition module, and recycle the heater after an inadvertent shutdown.
- 3. The heater's control system shall be designed to shut off the gas flow to the main burner in the event either a gas supply or power supply interruption occurs.
- 4. The heater's blower motor shall be thermally protected and the motor's impeller shall be balanced.
- 5. Heater control assembly shall include two indicator lights that define the units operating features. One indicator shall validate air flow. One indicator light shall indicate gas valve energization.
- 6. An automatic reset high limit switch shall be mounted in the air stream to shut off the gas supply in the event of overheating.
- 7. A time delay relay shall be incorporated that delays the start of the air blower fan to allow the heat exchanger a warm-up upon a call for heat. A time delay relay shall be incorporated to continue the air blower fan operation after the thermostat has been satisfied to help remove any residual heat in the exchanger.
- 8. No condensation shall form in the exchanger tubes while at operating temperatures.
- G. Air Movement:
 - 1. The motor type shall be single-speed, open drip proof (ODP).
 - 2. The motor shall be rated for: (115V/60Hz/1Ph).
 - 3. Swept winged fan blade designed to optimize air flow and reduce noise levels.
 - 4. Stainless steel, adjustable air discharge louvers with seamless airfoil design to maximize airflow.
- H. Venting: shall be per manufacturer approval and specifications.
- I. Thermostat: devices and wiring are specified in Division 23 Section "Instrumentation and Control for HVAC."
 - 1. Thermostat: digital programmable wall-mounting type with 50 to 90 deg F (10 to 32 deg C) operating range.
 - 2. Other approved operating device.
 - 3. Control transformer: internally mounted.
