

# BOOST JUICE<sup>®</sup> SOLUTIONS

**HVAC/R PERFORMANCE ENHANCER ADDITIVE IN CANS OR FLEXIBLE INSTALLATION HOSES**

**Part# 992**  
**Boost Juice Inject**

Boost Juice<sup>®</sup> is an HVAC/R system performance improvement additive that lowers energy costs by reducing the amperage draw up to 22% (testing average of 13%) on a system when running. It does this by lubricating the components, removing moisture and oxygen, and dissolving particle debris to a molecular level. This debris is captured in the liquid line drier reducing drag and friction for the refrigerant and oil.

By using Boost Juice, customers can expect to see noticeable improvements in system performance typically within 24 to 72 hours (depending on the state of the system - new versus old) with consistent future performance. Noise levels will also be reduced once Boost Juice is installed providing a long-term benefit to customers.

**Additional features and benefits for owners:**

- Enhances system performance, saving money on electric bills
- Reduces compressor noise
- Reduces energy consumption lowering starting and running amps
- Rejuvenates older systems
- Cleans interior linesets and system components removing loose deposits
- Improves oil lubricity through reduced friction and drag while blending with system oil and refrigerant
- Eliminates up to 20 drops of internal moisture prolonging system life
- Prevents acid formation

**Part# 993KIT**  
The Boost Juice Kit comes with one 2 ounce can and non-reusable hose

**993KIT**  
**Available in 6 unit cases**

**992**  
**Available in 4 unit cases**
