## Flash Detect UV Dye Solutions

Flash™ Detect Inject (990) is an integrated UV dye solution that injects without the use of tools or manifold gauges just like Flex Inject Sealant Advanced and Total. As soon as it enters the system, the green dye quickly exposes leaks with the use of a UV light (the Cliplight 89DC is recommended). Flash™ Detect Inject is ideal in locations where leaks are not easily spotted with conventional methods. The highly soluble fluid exposes all leaks, making them easy to find. You can then use either DiversiTech’s Super Seal Sealant Advanced (can version) or Flex Inject Sealant Advanced (flexible hose version) to fix the leak.

Flash™ Detect UV dye (980) is the can version of the advanced class of highly concentrated ultraviolet dye that uses DRY R™ instead of POE oil as its carrier. One can treats up to 64 oz (1.8L) of oil. Flash Detect UV dye uses the system’s refrigerant as the propellant – creating a clean, no-mess injection every time. Required hose sold separately (20122).

ITEM #	DESCRIPTION	UOM	ORDER MULTIPLE	LIST PRICE
980	Flash™ Detect UV Dye in can - Up To 5 Tons	EA	12	\$33.16
990	Flash™ Detect Inject UV Dye in hose - Up To 5 Tons	EA	6	\$141.40
20122	Universal Clear Charging Hose - HVAC/R	EA	1	\$30.52
