Design Features / Options

Tri Pro's Advantage

- | | |
|--|--|
| • Fire Safe Certified to API 607 7th Edition | • Ability to handle extreme pressure and temperature shock |
| • ISO 5211 Actuator Mounting Pad | • Ability to withstand higher pressure drop |
| • Secondary media containment(available) | • Ability to handle slurries and resist abrasion and wear |
| • Anti-static grounding device | • Bubble tight sealing to 500°F |
| • Weld-in-Place, SW / BW | • Bubble tight sealing to 2250 psi / 3000 psi |
| • Protected seat design | • Ability to handle thermal fluids and super heated steam |
| • Two fully contained body seals | • Superior stem seal design |
| • Cap screw body assembly | |
| • Cryogenic service (available) | |
| • V-Port control (available) | |
| • Metal seats (available) | |

REFINED BY DESIGN, DIFFERENT BY INTENT

Tri-Pro! One Valve for Most Applications

Design Specifications and Standards of Compliance

Technical Specification

ANSI Class 600/800

I-SO Mount Actuator Mounting, 4 Bolt design eliminates torsional stress, actuator can be removed while valve is under full pressure

Parallel flat stem head for positive ball position indication. 17-4 PH as standard stem material

Anti-static grounding devices at two locations provide electrical continuity

Pocketed and recessed seats with secondary metal backup seal

Fully encapsulated graphite gaskets isolate media from atmosphere

Locking device

Tab washer prevents nut from loosening

Lived-loaded Belleville washer maintains constant packing load

V-Ring packing rings form a rigid, high cycle stem seal

Thrust bearing enables an excellent long life bearing support

Fully encapsulated TFM gaskets adds secondary barrier

Body precision investment casting, shell/wall ANSI B16.34

Fully encapsulated cap screws protected from outside environment

All Tri-Pro valves are designed to meet ASME/ANSI B16.34 Class 600 specifications and can be certified as such upon request at order submittal. The valve design is in compliance with BS 5351, BS 5159.

Threaded and Socket Welding Ends meet **ASME/ANSI B16.34 Class 600/800 or 2250WOG (sizes: 1"~4")/3000WOG (size: 1/4"~3/4")**.

Threaded End Connections meet ASME/ANSI B1.20.NPT, BSPT ISO R/7, BS21, MSS-SP-110

Socket Weld End Connections meet ASME/ANSI B16.11, MSS-SP-110
Butt Weld End Connections meet MSS SP72, ANSI B16.25, B16.5 Figure 2 detail recommended sch.40 up to 1000 psi, sch.80 up to 2200 psi.

Flanged End Connections meet ASME/ANSI Class 600, ASME/ANSI B16.10 and B16.5.

MSS SP25 compliance for standard marking system.

All Tri-Pro Valves with 316SS stems can meet NACE MR0175 as an option, especially for sour gas service.

All valves are Fire Safe & certified to API 607 7th Edition. Fire Safe Designed Valves must have graphite stem packing.
All valves are in compliance with federal Spec WW-V-35C Type II.

All valves are in compliance with API 608.
Valve body and end connections are high quality investment cast and solution annealed/normalized.

Valves (sizes: 1-1/4" ~ 2") certified to European Standards: EN 1226-1, EN 10213, EN12516-2 by:
TÜV Rheinland Industrie Service GmbH
Notified Body, ID-No. 0035
Am Grauen Stein, D-51105 Köln

All valves have CE marking on either metal name plate or handle sleeve. All valves are hydrostatically shell tested to 1.5 x rating.
All valves 100% air tested under water at 80-100 psi.

Vacuum Service Suitable to 25 Torr

Specially cleaned and lubricated valves can handle services 20 mm of Hg (20 micron)

Quality Assurance

All valves are manufactured to ISO 9001 quality standards.

Ball Design Added Safety Feature

All balls are provided with a 1/8" hole drilled into the stem slot of each ball to prevent excessive pressure build up in the cavity from trapped liquid when the valve is in the open position.

Flo-Tite's Van Guard Stem Sealing System

Flo-Tite's Van Guard Seal, state of the art stem sealing system. Incorporating a triple set of valve stem seals, this unique system eliminates the possibility of valve stem leaks in most all media applications. Improved thrust washer design allows more sealing surface effectively blocking all leak paths during rotation.

V-Ring Packing Set expands sideways as it is compressed and pressurized, blocking all air pockets. The Van-Guard stem system is energized by Belleville washers which continuously adjusts packing compression to compensate for wear, pressure, or temperature fluctuations.

Note: • Standard Valve is Fire Safe Design with Graphite Packing.

• For higher sealing requirements, optional O-ring is available upon request.

**2-1/2"-4"
Tri-Pro

Ordering Information

When placing an order or requesting a quotation, please provide as many details on the application as possible, such as media type, temperature, pressure, pipe size, and etc.

Dimensions - Actuation / Flow Data

Pneumatic Actuator Dimensions shown in this drawing are for full port units based on 80 psi air to actuator, valves with standard seats, clean fluid only at ambient temperatures and pressures not to exceed 1500 psi. Consult factory for additional actuator types and dimensional drawings.

V-ports 15, 30, 60, 90 deg V & custom designs are available.

Tri-Pro in Control Valve Service

Flo-Tite also offers modulating V-port control valves. The V-ball is characterized to meet virtually all flow requirements. See tech bulletin 120-22.

All actuators above are generally sized for clean wet service

Torque Factors for Special Applications:

- 1 - Increase the breakaway torque by 20% for dry gas service or demineralized water.
- 2 - Add 10% for infrequent cycling.
- 3 - Add 40% for slurry or light abrasive content.
- 4 - Add 60% for metal seated valves, class V shut-off.
- 5 - Deduct 10% for high lubricity service.

Torque figures are for valves up to 1500 psi service. For higher pressure applications consult factory. Valve torque can vary due to pressure, media and temperature.

The information provided above should be considered as a guide only and must be adjusted according to experience and judgment.

All Tri-Pro Valves have integrally cast mounting pads, for ease of mounting actuation equipment.

Tri-Pro in Cryogenic Service

The Tri-Pro Series can be provided specifically for cryogenic applications. All cryogenic ball valves have extended bonnets. They offer exceptional performance under the most extreme cold working temperature conditions. See tech bulletin 138-19.

3-Way Diverter
Sizes 1/4" - 2 1/2" available

True High Performance Ball Valve Technology

A superior quality, rugged, and universal purpose valve for all fluids. This valve is ideal for saturated or superheated steam, slurries, semi-solids, and corrosive services in endless industrial, chemical, power, gas, paper, and original equipment applications.

Three Piece Design	Offers a wide selection of pipe end connections. Swing out center body allows easy access to internal valve components.
Fully Protected Body Seals	Prevents seal ruptures in high pressure or steam applications.
Live-Loaded Blow-Out Proof Bottom Entry System	Self adjusts with pressure and temperature fluctuations. Blow-out proof bottom entry stem, antistatic grounds help prevent accidents and injuries.
Secure Body Bolting	Cap screws - fully encapsulated secure end caps to tapped center body. Insuring ease of foolproof body assembly every time. Also protects bolts from outside environment.
Integral Actuator Mounting Pad	Ideal for actuation, ISO-5211 bolting, actuators may be retrofitted without disturbing the pipeline. Allows for secondary containment unit to be added when necessary.
Captured Seats	Pocketed and recessed seats with secondary metal backup seal, meeting API607-7. Super-TEK TFM, S-TEK 50/50, metal seats and more.
Weld-in-Place	Heat sink construction allows in place welding, prevents damage to soft seat rings and eliminates the need to disassemble valve for welding. Assures safe & cost effective installation.
High-Strength Stem	Parallel flat stem head for positive ball position indication. High strength 17-4 PH stainless steel is provided as standard.
Lockable-Safety Handle	Prevents valves from being opened or closed accidentally. Lock-out meets OSHA standards with locking device.

MATERIAL IDENTIFICATION

Flo-Tite's marking system follows MSS SP-25-1998 guidelines. In addition to the casted body information, all valves have metal nameplates that identify all valve soft parts. Valve users worldwide will be able to contact Flo-Tite quickly for any installation or service requirements as the company website address will be on all valves.

Tri-Pro with Media Containment Units

The ISO Mount platform is ideal for the addition of our secondary containment units.

Flo-Tite's media containment unit offers in-line maintenance for stem repair, protection for high temperature service, fugitive emission monitoring for early leak detection, and positive displacement. It also can be used as a high tech stem extension.
