# WE STAND BEHIND QUALITY.

For over 70 years L.B. White has been America's leading portable heat designer. With Midwestern manufacturing expertise, we stand behind our craftsmanship, too. So much so, we back our products with a two-year limited warranty—the first and only of its kind in the industry.\*

### **Built to last**

Construction environments can be hard on equipment especially in winter. To safeguard your investment, L.B. White heaters are engineered to hold up to years of use. Robust materials and careful workmanship combine

- in heavy-duty features, like:
- Fully welded heat exchangers
- Powder coated protective frames
- Heavy gauge combustion chambers

A commitment to quality you can count on. Every unit is backed by an industry-leading two-year warranty.\* Before leaving our docks, every heater is test-fired and carefully inspected. It's been L.B. White tradition since 1952.

# FIT YOUR JOB SITE

### WHAT BTU/H IS NEEDED TO HEAT A GIVEN AREA?

- 1. Multiply room length x width x height to determine total cubic feet.
- 2. Locate desired rise in temperature.

Example: Room is 10°C / 50°F, desired temperature is 21°C / 70°F = 11°C / 20°F rise in temperature 3. Read Btu/h

CUBIC				<b>RISE IN TE</b>	MPERATUR	E		
FEET	6°C / 10°F	11°C / 20°F	17°C / 30°F	22°C / 40°F	28°C / 50°F	33°C / 60°F	39°C / 70°F	44°C / 80°F

### WHAT SIZE GAS SUPPLY IS Needed for my heater?

The number of Btu/h may vary from the chart due to building configurations, materials, and weather variables.

Commander manages air conditions in construction sites where improved air quality, temperature control, and moisture reduction is a necessity. These areas demand tempered heat while maintaining positive pressure all done using the Commanders modulating control and powerful air flow that is proven.

L.B.WHITE

Commander 1000

- ✓ Constant air exchanges
- ✓ Modulating control reduces fuel costs
- ✓ Provides tempered fresh air
- Evenly heats interior and surfaces
- ✓ Maintains positive building pressure
- ✓ Available in 500,000 and 1,000,000 Btu/h

NEW 1,000,000

Commander 1000

Vent mode Keep heated air working hard

without using more fuel. Moves heated air throughout the space using fan only.

# Features

**Remote Digital thermostat** offering the same functionality as the internal temperature control, but tethered to a convenient location

**Thermostatic control** option for set-it-and-forget-it efficiency. In applications where heat is ducted to a different space, option to operate thermostat remotely.

**Fault indicators** Top light indicates a High Limit condition, while bottom light indicates a heater fault.

## Commander™ CFM Comparison

**Commander CFM Comparison** Commander<sup>™</sup> manages air conditions in construction sites. These areas demand tempered heat while maintaining positive pressure achieved with our powerful air flow that is proven.

FOREMAN<sup>®</sup> Ductable Indirect-Fired Portable Heaters

Indirect-fired heat with reliable CFM

Vented to provide clean, dry heat

- Fuel-conscience design with options to recirculate heated air and use remote thermostat
- ✔ Quiet with less than 70 dB operation
- ✓ Optimal portability with wheels, handle, fit through standard 36" door frame, single point lifting bail and forklift pocket\*
- ✓ Built to last with fully welded heat exchangers and powder-coated frame

- Exhaust Pipe Extension, Steel, Foreman 230s/500s/750 DF, 6"dia., 30161
- Exhaust Pipe Extension, Steel, Foreman 750 Oil, 8"dia., 30161A
- Gas Hose, 3/4" x 15', Foreman 230/500, 25965
- Gas Hose, 1" x 15', Foreman 750, 132047
- Regulator, all Foreman DF, 25141\* Heater Stacking Kit, Foreman 500/750, 30903
- Duct Adapter Kit, 16", 30902

\* When running on NG requires 1" hose diameter and inlet pressure of at least 10 P.S.I. When inlet pressure is 2 to 10 P.S.I. use regulator, 132136.

9

# **CLEAN, DRY HEAT**

Forem

L.B.WHITE

Deliver heat that is free of the byproducts of combustion with the Foreman indirect-fired series.

n 500 DF

# Quiet operation

Reduces sound pollution and makes meeting OSHA standards easier with less than 70 dB of sound output while operating.

### **Rental ready**

#### Indoor-outdoor rated

Operate outdoors and duct up to 100 feet to save space in work areas
Vent outside or into existing chimney to operate indoors and mitigate heat loss

#### **Fuel flexibility**

- Dual Fuel (DF) model operates from natural or propane gas with the turn of a ball valve. No conversion kit required.
- Oil model has on-board tank or easily connects to remote fuel tank.

### **Optimal portability**

- One person portable with wheels, handle and fit through standard door
- Foreman 750 does not require a forklift to move
- Equipped with single point lifting bail and forklift pockets on 500/750

### Efficient off season storage

### Typical Sound Levels (dBA)

Lifting bail

Stands on end (Foreman 230)

Stacks two units high with optional stacking kit (Foreman 500 & 750)

### **Fuel-conscience features**

Recycle air that's already been heated and use less fuel.

#### Thermostatic control

Automatically heat to a set temperature and use only as much fuel as is required with the remote thermostat option.

Keep heated air working hard without using more fuel. Moves heated air throughout the space using fan only.

## Centralized control panel

### Less power supply headaches

With the onboard volt meter, operators can easily confirm adequate power is available from the start and monitor throughout heater operation.

### Streamlined status and diagnostics

Heater status lights provide a quick indication of operation status. If problems arise, status lights streamline troubleshooting and can save service managers a trip.

### Anticipate maintenance

Take the guesswork out of how long a heater ran when on rental with the hour meter. Rely on the actual heating hours to schedule maintenance rather than calendar days.

### **Burner-specific insights**

The Beckett<sup>®</sup> GeniSys<sup>™</sup> control provides status and diagnostic information specific to the burner.

JOURNEYMAN® Ductable Indirect-Fired Portable Heaters

## Trimmed and simplified raw heat

Vented to provide clean, dry heat

- ✓ Simplified units with less electronics to deal with
- ✔ Quiet with less than 70 dB operation
- ✓ Optimal portability with wheels, handle, fit through standard 36" door frame, single point lifting bail
- ✓ Built to last with fully welded heat exchangers and powder-coated frame

LEWHITE Journeyman 360

- Dual Fuel (DF) models can quickly switch from NG to LP
- Oil models have an onboard fuel tank and option to run diesel #1 or #2

**PREMIER**<sup>®</sup> Enclosed-Flame Direct-Fired Portable Heaters

# Enclosed flame design invented by L.B. White

LEWHITE Premier 170 🛛

Direct-fired efficiency with added safety

- Enclosed flame promotes safer work environments and provides option to duct
- ✓ 99% direct-fired fuel efficiency boosted by remote thermostat and option to move air only like a fan
- ✔ Quiet with less than 70 dB operation
- Dual Fuel (DF) models quickly switch from NG to LP
- Fits through standard 36" door frame while handles and wheels
- on larger models provide maneuverability

L.B. White LINK™ Now telematics-enabled to put critical alerts, runtime, location, and more at your fingertips. Learn more at LBWhite.com/LINK.

- 500-133766, Kit Mobility

# **EVEN, EFFICIENT HEAT**

Do more with enclosed flame technology that provides steady, 99% fuel-efficient heat with the option to duct.

L.B. White was the first company to innovate enclosed flame portable heat technology. Enclosing the process of combustion separates the flame from the environment while still providing the 99% fuel efficiency delivered by direct-fired technology.

### Reliable heat where you need it

Certified to ANSI and CSA standards for safety and rated for indoor-outdoor use.

Flexible setup and an even, steady heat delivery make Premier heaters well-suited to many applications from framing, drywalling, stucco work, construction enclosures, brick and block laying, freeze protection, bridgework, docks to excavation and more.

By enclosing the flame and adding a fan to the design, L.B. White enclosed-flamed Premier heaters can be ducted from point A to point B for added flexibility in application.

Model	Duct Diameter	Max Duct Length
Premier 40	8"	12'
Premier 80/80 DF	12"	12'
Premier 170/170 DF	12"	12'
Premier 350 DF	18"	25'

# **Quiet operation**

Avoid excessive job site noise by using Premiers with industry-leading quiet operation. All models operate at decibel levels equivalent to classroom chatter or average conversation.

PREMIER ★ (CLASSROOM CHATTER) OTHER GUYS (FREIGHT TRAIN)

### Easy to setup and operate

**Dual fuel** models switch from LP to NG with the turn of a ball valve. No changeover kit needed. Start a job with propane and switch over to natural gas once available without changing heaters. Valve can be locked, if needed, to prevent tampering when on rent.

**Thermostatic control** option for set-it-and-forget-it efficiency. In applications where heat is ducted to a different space, option to operate thermostat remotely by adding extension cord. Every model ships standard with this accessory.

**Multi-mode** options allow for heat and vent mode. Vent mode will operate unit's fan only when space is up to temperature and only air circulation is needed.

**Status lights** indicate heating mode stage and quickly aid diagnosis of common issues when troubleshooting.

The Premier 40 offers the convenience of operating from a 20 lb. tank for 6 to 8 hours in many applications. Available in LP only.

# **Optimal portability**

From handle to wheel features, every Premier model is carefully equipped to move about the job site or to the next rental location with ease.

### BOSS<sup>™</sup> High CFM Direct-Fired Portable Heaters

# **Big heat with high CFM**

Most efficient heat for large spaces

- Easy to operate with onboard volt meter and status light
- 99% direct-fired fuel efficiency boosted by onboard thermostat and option to move air only like a fan
- True portability with cool-end handle, wheels, and fit through a standard 36" door frame
- Saves storage space with option to stand on end or stack
- Built to last with Tri-shield<sup>™</sup> coated steel case, and powder coated hardware that protects against abrasion and corrosion

.

# **RELIABLE, DIRECTIONAL HEAT**

Put heat right where you need it with the Tradesman<sup>®</sup> propane forced-air heaters.

This time-tested design uses an axial fan to force heated air into a single direction 12 to 15 feet

#### Knob 💄

Leg

Adjustable front leg on some models allows heat to be directed up or down

THE TRADESTRONT TO WING

Manufactured in Wisconsin from durable components to provide years of dependable performance\*

Made with the industry's heaviest gauge combustion chamber and burner plate. Tri-shield™ coated case protects against abrasion and corrosion\* Easy grip handle & lightweight design make it convenient to move and adjust as the job site changes

> Loaded with reliable safety features. Certified to CSA and ANSI standards

Variable rate valve allows heater output to be adjusted from low to high for maximum fuel efficiency

Diagnostic light feature included on Ultra models for added operator support and streamlined troubleshooting

> Flanged male electrical inlet provides clean connection less prone to getting dirty or wet like pig tail designs

Thermostatic control saves fuel automatically

**Fuel Flexibility** Operate Tradesman Ultra DF from propane or natural gas with the turn of a selector value

Tradesman® heaters are direct fired therefore require proper ventilation. Always install and use the heater in accordance with the owner's manual and instructions.

\*Tradesman 125 not made in Wisconsin. Case made with enamel-coated steel and does not include thermostat.

## TRADESMAN<sup>®</sup> K Kerosene Forced Air Portable Heaters

# **EFFICIENT HEAT WITHOUT ELECTRICITY**

A convection heat pattern can warm up spaces fast. No electricity on the job site yet? No problem. Our convection heaters don't need it.

As the heater warms, the surrounding air will increase in temperature, expand, and rise to the top of the space. This forces down the cooler air so it can be heated creating a convection heat pattern.

Manufactured in Wisconsin from durable components to provide years of dependable performance\*

LEWHITE Workman 225 Plus

No electricity required, so great for early phases of new construction

Unique top design provides superior heat distribution

Heavy-duty, one-piece barrel

Norseman model offers heaviest gauge steel body available on the market optimal for heavy industry use and rental fleets

No assembly required (Workman model)

Adjustable output control for maximum fuel efficiency (Workman model) Save fuel with adjustable shut-off (Norseman model)

Workman<sup>®</sup> and Norseman<sup>™</sup> heaters are direct fired therefore require proper ventilation. Always install and use the heater in accordance with the owner's manual and instructions.

LEWHITE NORSEMAN 200 Plus

# Combines low operating costs with rental-ready features

### ✓ Rental-ready features

- Automatic pump shut-offs prevents pump burnout when water runs out
- Quiet operation at less than 60 dB
- · Adjustable with louvers that allow airflow to be adjusted up or down
- Option to set run times

#### Low operating cost

- 10-gal water tank provides 3-4 hours or runtime with easy to read water level display
- Convenient garden hose connection for continuous fill
- Operates from standard circuits with low amp draw and safe GFCI connection

#### **Cooling Technology**

-Inasa

Law

Water from an onboard tank is pumped to the top of a filter-like cooling pad. Then, a 3100 CFM fan pulls warm, environmental air over the filter and pushes out air with a cooling effect 30+ feet.

PORTABLE EVAPORATIVE COOLER	PC-31
Coverage area	950 sq. ft.
Airflow delivery	3,100 CFM
Fan motor	1/5 H.P. 115 V 3 speed
Power requirement	115 V
Amps	2.8
Water tank capacity	10.3 Gal
Run time capacity	3-4 hours
Max water connection pressure	50 PSI
Unit dimensions	38"H X 24"W X 17"D
Unit weight	45 Lbs.
One year warranty	S
