Fire & Smoke, 180 in-lb at 350°F for 30 min., 25 sec. drive, 15 sec. spring

Application

The FSAF_A actuators provide true spring return operation for reliable fail-safe application and positive close-off on UL555S dampers. The spring return system provides constant torque to the damper with and without power applied to the actuator. The FSAF_A series provides 95° of rotation and is provided with a graduated position indicator showing 0 to 95°.

Operation

The FSAF_A series actuators are mounted to the damper axle shaft or jackshaft (1/2" to 1.05") via a cold-weld clamp. Teeth in the clamp and V-bolt dig into the metal of both solid and hollow shafts maintaining a perfect connection. The specially designed clamp will not crush hollow shafts. The bottom end of the actuator is held by an anti-rotation strap or by a stud provided by the damper manufacturer. The actuator is mounted in its fail safe position with the damper blade(s) closed. Upon applying power, the actuator drives the damper to the open position. The internal spring is tensioned at the same time. If the power supply is interrupted, the spring moves the damper back to its fail-safe position.

Safety Notes

* Neither UL nor Belimo require local over-current protection. The FSAF_A actuators draw higher peak current when driving against any type of stop. After 10 seconds current drops to the lower holding level. If used, this requires the value of a local fuse or breaker to be increased to avoid nuisance opening or tripping. A 2 A slow blow should be used for 24 VAC. A 0.5 A slow blow should be used for 120 VAC. A 0.25 A slow blow should be used for 230 VAC and a 0.3 A slow blow for 208 VAC.

Transformers:

Note that while a 24 V 100 VA transformer would handle 3 actuators run current, a 4 A breaker or plug fuse is insufficient. A 6 A slow blow would be required.

Accessories	
AF-P	Anti-Rotation Bracket
IND-AFB	AFB/NFB position indicator
KG8	Ball joint (5/16", 90°)
KH-AFB	AFB/NFB crankarm, 3/4" shafts
SH8	Push rod for KG6 & KG8 Ball Joints (36", 5/16" Dia.)
T00L-06	8 mm and 10 mm Wrench
ZG-100	Right Angle (17"H x 11 1/8"W x 6 1/4" base)
ZG-101	Right Angle (13"H x 11 1/32"W x 6 1/8" base)
ZG-102	Multiple Actuator Mounting Bracket
ZG-AFB	AFB/NFB Crankarm Adaptor Kit
ZG-AFB118	AFB/NFB Crankarm Adaptor Kit
ZS-100	Weather Shield - Galvaneal
ZS-150	Weather Shield - Polycarbonate
ZS-260	Explosion Proof Housing
ZS-300	NEMA 4X, 304 Stainless Steel Enclosure
BAE165 US	165°F electric thermal sensor. SPST, NC
S2A-F US	Auxiliary Switch, 2x SPDT, 3A (0.5A inductive) @ 250 VAC

Typical Specification

All smoke and combination fire and smoke dampers shall be provided with Belimo FSTF, FSLF, FSNF, or FSAF actuators. All substitutions must be approved before submission of bid. Damper and actuator shall have UL 555S Listing for 250°F &/or 350°F. Actuator shall have been tested to UL 2043 per requirements of IMC 602.2 and NEC 300.22 (c). Where position indication is required -S models with auxiliary switches or damper blade switches will be provided per code requirements.

Wiring Diagrams

 \uparrow Provide overload protection and disconnect as required.

Actuators may be powered in parallel. Power consumption must be observed.

Ground present on some models.

Meets cULus requirements without the need of an electrical ground connection.

Typical containment damper control wiring

Typical smoke or fusible link damper wiringi
