

NSV-BAT 12V Battery

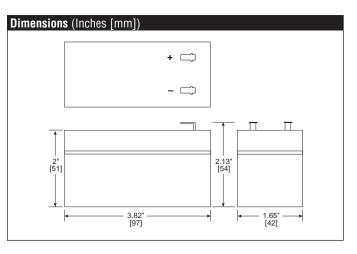

| Technical Data | NSV-BAT |
|------------------|-----------------|
| Battery type | Lead-acid |
| Voltage | 12 VDC |
| Nominal capacity | 1.2 AH |
| Connections | .187 male spade |
| Weight | 1.32 lb [.6 kg] |

ZG-R01 Resistor for 4 to 20 mA conversions

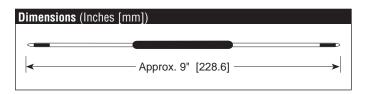

Application

The NSV-BAT battery is for use with the NSV24 battery back-up module. It is a sealed, maintenance free, lead-acid battery. Two NSV-BAT batteries are required for one NSV24.

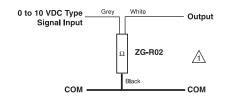

Application

The ZG-R01 is a 499 Ω Resistor which has been encased in a section of heat shrink tubing with short sections of hook up wire. The ZG-R01 is used to convert a 4 to 20mA signal into a 2 to 10 VDC control signal.

ZG-R02 50% Voltage Divider

f The impedance of the device attached must be 100k Ω .

Application

The ZG-R02 is a voltage divider designed so that when connected to a 100 K Ω input impedance, the output signal is 50% if the input signal. The voltage divider circuit is encased in a short section of heat shrink tubing with three short sections of hook up wire.
