

# VG1000 Series Forged Brass Ball Valves

## Product Bulletin

Code No. LIT-977132  
 Issued July 6, 2011  
 Supersedes August 27, 2008

Refer to the [QuickLIT Web site](#) for the most up-to-date version of this document.

VG1000 Series Ball Valves are designed to regulate the flow of hot or chilled water and, for some models, low pressure steam in response to the demand of a controller in Heating, Ventilating, and Air Conditioning (HVAC) systems. Available in sizes 1/2 through 2 in. (DN15 through DN50), this family of two- and three-way forged brass valves is factory or field mounted to Johnson Controls® VA9104, M9106, M9109, and M9100 Series Non-Spring Return and VA9203 and VA9208 Series Spring Return Electric Actuators for on/off, floating, or proportional control. For sweat and press end connection valves supplied with an actuator, the actuator is not mounted to the valve to allow access to the end connections.

**Figure 1: VG1000 Series Ball Valves Shown with Factory-Mounted M9000 Series Electric Actuators**

**Table 1: Features and Benefits (Part 1 of 2)**

Features	Benefits
<b>National Pipe Thread (NPT), Sweat, and Press End Connections</b>	Provide the right valve for a broad range of applications, reduce installation time while reducing the need for adapters, and increase system reliability.
<b>Forged Brass Body</b>	Provides 580 psig static pressure rating.
<b>Amodel® Flow Characterizing Disk</b>	Maintains equal percentage flow characteristics for best temperature control, available in a wide variety of Cvs to cover a broad range of applications.
<b>200 psi Closeoff Pressure Rating</b>	Provides tight shutoff.
<b>Chrome-Plated Brass Ball and Stem Assembly Standard</b>	Handles both chilled and hot water applications with a fluid temperature range of 23 to 203°F (-5 to 95°C).
<b>300 Series Stainless Steel Ball and Stem Assembly</b>	Tolerates high temperature water or 15 psi saturated steam with fluid temperatures of -22 to 284°F (-30 to 140°C) or where a higher degree of corrosion protection is desired.
<b>500:1 Rangeability</b>	Provides accurate control under all load conditions.
<b>Ethylene Propylene Diene Monomer (EPDM) Double O-Ring Stem Seal</b>	Provides a leak-free seal; the packing has been tested and is leak-free after 200,000 cycles in iron-oxide contaminated water.

**Table 1: Features and Benefits (Part 2 of 2)**

<b>Features</b>	<b>Benefits</b>
<b>Graphite-Reinforced Polytetrafluoroethylene (PTFE) Seats</b>	Include 15% graphite-reinforced ball seals, providing better wear resistance.
<b>Blowout-Proof Stem</b>	Protects the user from the risk of injury.
<b>Maintenance-Free Design</b>	Performs without failure in excess of 200,000 full stroke cycles in iron-oxide contaminated water.
<b>Wide Selection of Styles for a Variety of Applications</b>	Offers various valve configurations including two- and three-way full port and reduced port models in chrome-plated brass and stainless steel trim.
<b>Factory-Mounted VA9104, M9106, M9109, VA9203 or VA9208 Series Electric Actuators</b>	Reduce installation time, thus reducing overall installation cost.
<b>M9000-520 Linkage Kit Available for Field Mounting to M9106 or M9109 Series Electric Actuators</b>	Reduces installation time, thus reducing overall installation cost; and provides superior thermal isolation between the valve and actuator.
<b>M9000-551 Linkage Kit Available for Field Mounting to M9104 Series Electric Actuators</b>	Lowers both space requirements and total cost by providing high thermal isolation in a compact size.
<b>M9000-560 Linkage Kit Available for Field Mounting to M9203 or M9208 Series Electric Actuators</b>	Lowers both space requirements and total cost by providing high thermal isolation in a compact size.
<b>M9000-561 Thermal Barrier Kit for Extending M(VA)9104, M(VA)9203, and M(VA)9208 Series Electric Spring Return Actuators</b>	Allows the valve assembly to be used for fluid temperatures up to 284°F (140°C), or 15 psi (105 kPa) saturated steam.
<b>M9000-341 Weather Shield Kit Available for Field Mounting M(VA)9104, M(VA)9203, and M(VA)9208 Series Electric Spring Return Actuators</b>	Protects the electric actuators from corrosion, rain, freezing rain, sleet and snow. The M9000-341 Weather Shield Kit is manufactured to National Electrical Manufacturers' Association (NEMA) 4X (IP66/67).

## Ordering Information

Table 2: Ordering Data<sup>1</sup>

V		G		Valve Global											
1	2	1	1	Product		1 = Forged Brass Ball Valve									
		3		Family											
		2		Body Type and Flow Characteristic		2 = Two-Way, with Equal Percentage Flow Characteristics									
		4		Body Type and Flow Characteristic		8 = Three-Way Mixing, with Equal Percentage Flow Characteristics of In-line Port and Linear Flow Characteristics of Angle-Port									
		4		End Connection		4 = Threaded - NPT Taper									
		5		End Connection		7 = Sweat (1/2 to 1 in. Sizes)									
				End Connection		9 = Press (ProPress® Fitting Compatible, 1/2 to 1 in. Sizes) Press End Connections are designed to work with RIDGID® Pressing Tools.									
		1		Trim		1 = Chrome-Plated Brass Ball and Nickel-Plated Brass Stem									
		6		Trim		5 = Stainless Steel Ball and Stem, 300 Series

				Actuator		+ = Factory-Mounted Actuator									
		9		Mounting		(Leave Fields 9 through 15 blank for valve without factory-mounted actuator.) H = High Temperature Linkage (VA9104, VA9203, and VA9208 actuators)									
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	= Field
V	G	1	2	4	1	A	E	+							
Valve								+ Actuator							

Example: Forged brass ball valve, two-way, threaded (NPT), brass trim, equal %, 1/2 in. (DN15) 1.9 Cv.

1. Before retrofitting older valves with VA9104, M9104, VA9203, or VA9208 actuators, be sure that the valves have a tapped hole in the center of the valve stem and no threads in the flange holes. These direct mount actuators do not fit older valves designed without a tapped center stem hole or with threaded flange mounting holes.
2. Indicates model without characterizing disk.

See Table 3 to determine the correct factory-mounted actuator, where needed.

**Table 3: Ordering Data – Adding a Factory-Mounted Electric Actuator<sup>1</sup>**

<b>M2000-561</b>	Thermal Barrier for VA9104/VA9203/VA9208 Series Actuators	Unit Replacement

## Application Overview

Available in sizes 1/2 through 2 in. (DN15 through DN50), VG1000 Series Ball Valves are designed specifically for automated commercial HVAC service. These valves feature a forged brass body with either a chrome-plated brass ball for water or glycol solutions to 203°F (95°C), or a 300 Series stainless steel ball for high temperature water to 284°F (140°C) and saturated steam to 15 psi. The Amodel Flow Characterizing Disk maintains equal percentage Flow Characteristics for optimum temperature control, as shown in Figure 2. The blowout-proof stem and mounting flange, combined with an innovative double O-ring stem seal and self-centering stem bushing design (shown in Figure 3) provide quick and easy electric actuator field mounting while ensuring long life and leak-free valve performance. The specially engineered,

graphite-reinforced PTFE seat with flexible PTFE seat design (backed with EPDM O-rings) significantly reduces the operating torque, allowing the smallest possible electric actuator available to provide the force required for the specific application. All valve and actuator assemblies provide 200 psig (1,379 kPa) closeoff pressure while ensuring operation after long idle periods. Because of their cost-effective, reliable design, VG1000 Series Ball Valves are maintenance free.

VG1000 Series Ball Valves are designed for factory or field mounting to a wide variety of Johnson Controls® M9000 and VA9000 Series Electric Actuators. Control signal selections include:

- floating point without timeout
- on/off and floating point
- on/off
- proportional

VA9000 Series Electric Actuators include mounting hardware for direct coupling to VG1000 Series Ball Valves. M9000 Series Electric Actuators require additional Valve Linkage Kits. See Table 27 for valid valve, actuator, and linkage kit combinations for assembly in the field.

### Valve End Connection

VG1000 Series 1-1/4, 1-1/2, and 2 in. (DN32, DN40, and DN50) valves are available with NPT threaded ends only.

VG1000 Series 1/2, 3/4, and 1 in. (DN15, DN20, and DN25) valves are available in one of three end connections:

- NPT Threaded
- Sweat end for copper tubing
- Press end for copper tubing

Press end connected valves are designed for installation using RIDGID Pressing Tool Technology manufactured by the Ridgid Tool Corporation for use with the ProPress fitting system. Press end connections afford significant installation savings. Additional information on these tools can be found at [www.ridgid.com](http://www.ridgid.com).

Figure 2: Typical Two-Way VG1000 Series Ball Valve with Characterizing Disk Flow

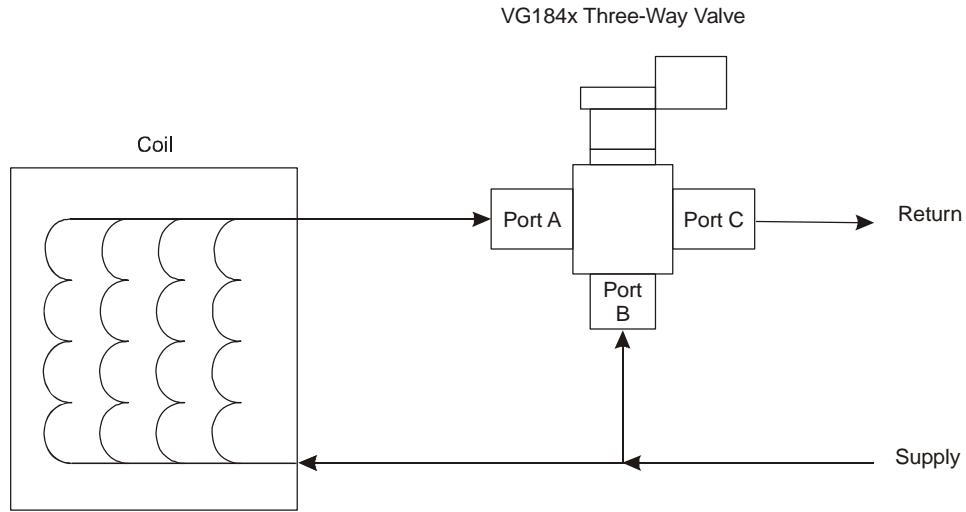

See Figure 3 for typical VG1000 internal composition.

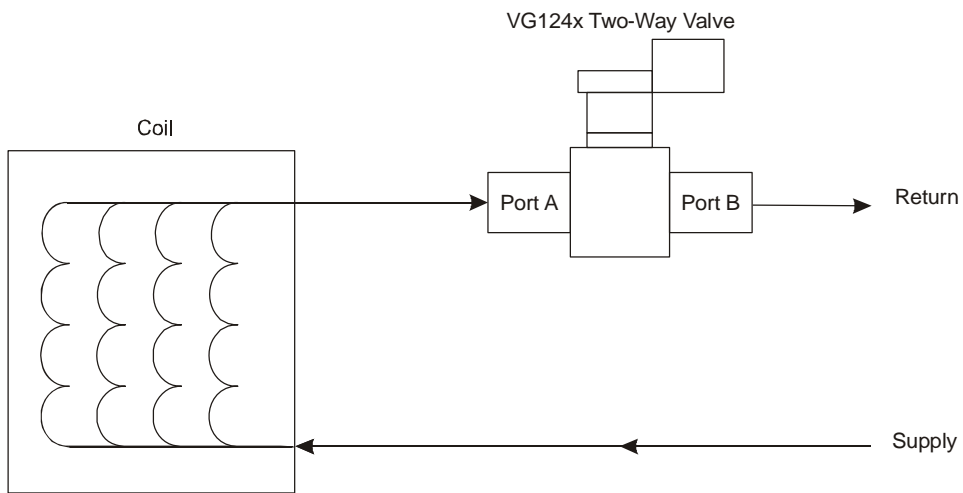

**Figure 3: Internal View of a Typical VG1000 Series Ball Valve**

See Figure 4 for typical piping applications.

Typical Three-Way Ball Valve Application

Typical Two-Way Ball Valve Application

**Note:** Mount the valve downstream from the coil to minimize heat transfer to the actuator.

**Figure 4: Typical VG1000 Piping**

FIG.VG1000\_13ppp

**IMPORTANT:** The VG1000 Series Valves are intended to control saturated steam, hot water, and chilled water flow under normal equipment operating conditions. Where failure or malfunction of the VG1000 Series Valve could lead to personal injury or property damage to the controlled equipment or other property, additional precautions must be designed into the system. Incorporate and maintain other devices such as supervisory or alarm systems or safety or limit controls, intended to warn of or protect against failure or malfunction of the VG1000 Series Valve.

### Electric Actuator Control Signal Action

Two-way VG1000 Series Ball Valves are fully open when the electric actuator is fully Counterclockwise (CCW) and fully closed when the electric actuator is fully Clockwise (CW). For three-way valves, the Port A and common port are fully open when the electric actuator is fully CCW, as shown in Figure 5. Port B and common port are fully open when the actuator is fully CW, as shown in Figure 6.

**Figure 5: VG1841 or VG1845 Series Three-Way Ball Valve (Port A Connected to Port C)**

**Note:** VG1841 and VG1845 three-way ball valves have a different port configuration (as shown in Figure 5 and Figure 6) from the older VG1644 Series three-way ball valves (Figure 7), and you must change the piping to convert them to the new series of valves.

For non-spring return and spring-to-open proportional control models in the direct-acting mode, a minimum control signal drives the electric actuator to the fully CCW position, whereas a maximum control signal drives the electric actuator to the fully CW position.

For spring-to-close proportional control models in the direct-acting mode, a minimum control signal drives the electric actuator to the fully CW position, whereas a maximum control signal drives the electric actuator to the fully CCW position.

**Figure 6: VG1841 or VG1845 Series Three-Way Ball Valve (Port B Connected to Port C)**

**Figure 7: Top View of VG1644 Series Three-Way Ball Valve (Actuator Fully CCW)**

For non-spring return floating or on/off (floating) control models, a control signal to Terminal 2 (or wire 2) of a VA9104 or an M91xx Series Actuator drives the electric actuator to the fully CW position. Likewise, a control signal to Terminal 3 (or wire 3) of a VA9104 or an M91xx Series Actuator drives the electric actuator to the fully CCW position.

A control signal to Wire 3 of side A mounted (away from the valve) VA9203 or VA9208 Series actuated spring-to-open floating control valve assembly drives the electric actuator to the fully CW position. Likewise, a control signal to Wire 4 of a floating CCW-face VA9203 Series or VA9208 Series Actuator, or removal of the control signal from Wire 3 of an on/off CCW-face VA9203 Series or VA9208 Series actuated spring-to-open valve assembly, drives the electric actuator to the fully CCW position.

A control signal to Wire 3 of a CW-face (mounted away from the valve) VA9203 Series or VA9208 Series actuated spring-to-close floating control valve assembly drives the electric actuator to the fully CCW position. Likewise, a control signal to Wire 4 of a floating CW-face VA9203 Series or VA9208 Series Actuator, or removal of the control signal from Wire 3 of an on/off CW-face VA9203 Series or VA9208 Series actuated spring-to-close valve assembly, drives the electric actuator to the fully CW position.

### Electric Actuator Selection

VG1000 Series Ball Valves are designed for factory or field mounting to a variety of M9000 and VA9000 Series Actuators. VA9000 Series Actuators include all hardware necessary for attachment to the valve. M9000 Series Actuators require an additional linkage. Refer to Table 32.

**Note:** To avoid excessive wear or drive time on the motor for VA9104, M9104, M9106, and M9109 AGx models, use a controller and/or software that provides a timeout function to remove the signal at the end of rotation (stall). The IGx and GGx models have an auto shutoff to avoid excessive wear or drive time on the motor.

For more information on these electric actuator series as well as details on models available, refer to the following documents:

- *VA9104-xGA-2S, -3S Series Electric Non-Spring Return Valve Actuators Product Bulletin (LIT-12011050)*
- *M9104-xGA-2S, -3S Series Electric Non-Spring Return Actuators Product Bulletin (LIT-1201742)*
- *M9106-xGx-2 Series Electric Non-spring Return Actuators Product Bulletin (LIT-2681123)*
- *M9109 Series Electric Non-spring Return Actuators Product Bulletin (LIT-120112)*
- *VA9203 Series Electric Spring Return Actuator Product Bulletin (LIT-12011702)*

- *VA9208 Series Electric Spring Return Actuator Product Bulletin (LIT-12011622)*

### Linkage Kit and Weather Shield Selection

The M9000-551 and M9000-561 Valve Linkage Kits and M9000-341 Weather Shield are designed specifically for field mounting Johnson Controls M(VA)9104 Series Non-Spring Return and M(VA)9203 and M(VA)9208 Series Spring Return Electric Actuators to VG1000 Series Ball Valves.

The M9000-516 Valve Linkage Kit and M9000-330 Weather Shield is designed specifically for field mounting Johnson Controls M9108 Series Non-Spring Return Electric Actuators to 1-1/4 to 2 in. VG1000 Series Ball Valves. For 1/2 to 1 in. VG1000 Series Ball Valves, use a VA9104 and M9000-341 Weather Shield. See Table 36 for valve, actuator, linkage, and weather shield combinations.

For more information on the M9000-520 Linkage Kit, refer to the *M9000-520 Ball Valve Linkage Kit Product Bulletin (LIT-1201547)* or the *M9000-520 Ball Valve Linkage Kit Installation Instructions (Part No. 14-1297-5)*.

For more information on the M9000-551 Linkage Kit, refer to the *M9000-551 Ball Valve Linkage Kit Installation Instructions (Part No. 34-636-1816)*.

For more information on the M9000-330 Weather Shield, refer to the *M9000-330 and M9000-340 Series Weather Shield Enclosures Installation Instructions (Part No. 14-1330-26)*.

For more information on the M9000-341 Weather Shield, refer to the *M9000-341 Valve Weather Shield Kit Installation Instructions (Part No. 34-636-2235)*.

For more information on the M9000-560 Ball Valve Linkage, refer to the *M9000-560 Ball Valve Linkage Kit and M9000-561 Thermal Barrier Installation Instructions (Part No. 34-636-2227)*.

					M9000-561 (Fluid Temperature ≤284°F)	

1. VA9104, M9104, M9106, M9108, M9109 and M9106 Series Actuators are non-spring return; and VA9203 and VA9208 Series Actuators are spring return. Note: VA9104, M9104, VA9203, and VA9208 have a maximum fluid temperature limit of 212°F (100°C). The VA9104, M9104, VA9203, and VA9208 temperatures can be increased to 284°F (140°C) or 15 psi steam with the addition of the M9000-561 thermal barrier.
2. To avoid excessive wear or drive time on the motor for VA9104, M9104, M9106, and M9109 AGx models, use a controller and/or software that provides a timeout function to remove the signal at the end of rotation (stall). The IGx and GGx models have an automatic shutoff to avoid excessive wear or drive time on the motor.

See Figure 8 for dimension drawings of the Non-Spring Return VA9104 Series Actuated VG1241, VG1245, VG1841, and VG1845 Series NPT End Connection Ball Valves. See Table 33 and Table 34 for specific model linkage dimensions.

## Technical Specifications

### VG1000 Series Forged Brass Ball Valves (Part 1 of 2)

<b>Service<sup>1</sup></b>		Hot Water, Chilled Water, 50/50 Glycol Solutions, and 15 psig (103 kPa) Saturated Steam for HVAC Systems
<b>Fluid Temperature Limits</b>	Water	<b>VG12x1 and VG18x1 Series:</b> 23 to 203°F (-5 to 95°C) <b>VG12x5 and VG18x5 Series:</b> -22 to 284°F (-30 to 140°C)
	Steam	<b>VG12x1 Series:</b> Not Rated for Steam Service <b>VG12x5 Series:</b> 15 psig (103 kPa) at 250°F (121°C)
<b>Maximum Actuator Fluid Temperature Limits</b>	212°F (100°C)	VA9104
		VA9203
		VA9208
		M9104 with M9000-551 Linkage
	284°F (140°C)	M9106 or M9109 with M9000-520 Linkage
		VA9104 with M9000-561 Thermal Barrier VA9203 or VA9208 with M9000-561 Thermal Barrier
<b>Valve Body Pressure/ Temperature Rating</b>	Water	<b>VG1241, VG1245, VG1841, and VG1845 Series:</b> 580 psig (3,996 kPa) at 203°F (95°C) (PN40) 464 psig (3,196 kPa) at 284°F (140°C) (PN40)
		<b>VG1275 and VG1875 Series:</b> 300 psig (2,067 kPa)
		<b>VG1295 and VG1895 Series:</b> 300 psig (2,067 kPa)
	Steam	15 psig (103 kPa) Saturated Steam
<b>Maximum Closeoff Pressure</b>		200 psig (1,378 kPa)
<b>Maximum Recommended Operating Pressure Drop</b>		50 psi Maximum Differential Pressure for Valves with Characterized Flow Control Disk and 30 psi Maximum for Quiet Service Ball Valves
<b>Flow Characteristics</b>	Two-Way	Equal Percentage
	Three-Way	Equal Percentage Flow Characteristics of In-line Port A (Coil) and Linear Flow Characteristics of Angle Port B (Bypass)
<b>Rangeability<sup>2</sup></b>		Greater than 500:1
<b>Minimum Ambient Operating Temperature</b>	-4°F (-20°C)	VA9104 and M9104 Series Non-Spring Return Actuators M9106, M9108, and M9109 Series Non-Spring Return Actuators
	-22°F (-30°C)	VA9203 Series Spring Return Actuator
	-40°F (-40°C)	VA9208 Series Spring Return Actuator
<b>Maximum Ambient Operating Temperature<sup>3</sup> (Limited by the Actuator and Linkage)</b>	Direct Mount or With M9000-561 Thermal Barrier	140°F (60°C): VA9104 Series Non-Spring Return Actuators VA9203 and VA9208 Series Spring Return Actuators
	M9000-551 Linkage	140°F (60°C): M9104 Series Non-Spring Return Actuators
	M9000-516	122°F (50°C): M9108 Series Non-Spring Return Actuators
	M9000-520 Series Linkage	125°F (52°C): M9106 and M9109 Series Non-Spring Return Actuators
<b>Leakage</b>		0.01% of Maximum Flow per ANSI/FCI 70-2, Class 4 (Two- and Three-Way Control Port) 1% of Maximum Flow for Three-Way Bypass Port

## VG1000 Series Forged Brass Ball Valves (Part 2 of 2)

<b>End Connections</b>		National Pipe Thread (NPT): 1/2 to 2 in. (DN15 to DN50) Sweat: 1/2 to 1 in. (DN15 to DN25) Use a low melting point solder. Press (ProPress compatible): 1/2 to 1 in. (DN15 to DN25) (Press end connections are designed to work with RIDGID pressing tools.)
<b>Materials</b>	Body	Forged Brass
	Ball	VG12x1 and VG18x1 Series: Chrome Plated Brass VG12x5 and VG18x5 Series: 300 Series Stainless Steel
	Blowout-Proof Stem	VG12x1 and VG18x1 Series: Nickel Plated Brass VG12x5 and VG18x5 Series: 300 Series Stainless Steel
	Seats	Graphite-Reinforced PTFE with Ethylene Propylene Diene Monomer (EPDM) O-Ring Backing
	Stem Seals	EPDM Double O-Rings
	Characterizing Disk	Amodel AS-1145HS Polyphthalamide Resin

1. Proper water treatment is recommended; refer to the VDI 2035 Standard.
2. Rangeability is defined as the ratio of maximum controllable flow to minimum controllable flow.
3. In steam applications, install the valve with the stem horizontal to the piping and wrap the valve and piping with insulation.

*The performance specifications are nominal and conform to acceptable industry standards. For application at conditions beyond these specifications, consult the local Johnson Controls office. Johnson Controls, Inc. shall not be liable for damages resulting from misapplication or misuse of its products.*
