

ELECTRIC WATER HEATER ELEMENTS

SCREW-IN ELEMENTS – 1-1/2 INCH – MARATHON/ECLIPSE

- Specially designed – screw-in elements with 1-1/2 inch threads are specially designed for these non-metal heaters.
- Watt Density Guide – lower watt density means the element stays cooler and will last longer.
LWD: low watt density (100 watts/in² or less)
MWD: medium watt density (101 – 150 watts/in²)

HWD: high watt density (over 150 watts/in²)

- Sheath Material Guide
 - Titanium: ultra-premium corrosion protection for extra long element life
 - Copper: high quality corrosion protection; may be coated with tin, nickel or other protective finish

ELEMENT ACCESSORIES

Element Wrenches

These wrenches are specially designed to fit all screw-in electric water heater elements.

- 1-1/2 inch hex heads are used on most water heaters

- 1-7/8 inch hex heads are used on Marathon and Eclipse heaters
- Allows use of screwdriver for additional leverage

PART NO	DESCRIPTION
PT49057	Element Wrench - Dual (Fits 1-1/2 in. & 1-7/8 in. Hex)
SP35871AB	Element Wrench (Fits 1-1/2 in. Hex)

Adapt-O-Flange Element Conversion Kit

Allows the use of a standard screw-in element in a water heater that originally used a flange element.
