

SH-500T

Safe-Heat®

Direct-Fired Portable Heater

The SH-500T portable construction heater offers the most efficient burn in the industry with an effective heating range between 100,000–500,000 BTU/h. Special safety features include our patented 100% stainless steel burner with exclusive inner-lined heat shield that maintains a cool outer shell and a red indicator light located near the on/off switch to warn of potential problems. An enclosed fan-cooled industrial motor drives a ten-blade, high-efficiency axial propeller, maintaining air movement through higher static pressures. This ductable unit offers a remote thermostat with a 25' cord.

Applications

- Construction
- Concrete Pours
- Fireproofing
- Masonry
- Painting
- Interior Finishes
- Freeze Protection
- Millwork
- Military
- Plants

TECHNICAL SPECS

Heating Capacity BTU/h	100,000 – 500,000
CFM	4,600
Fuel Type	Propane/Natural Gas
Max. Fuel Usage per Hour	Propane – 5.46 gal Natural Gas – 5 therms
Power Supply	120V, 10 amps, 1 ph
Net Weight/Shipping Weight	135/170 lbs
Dimensions, W×D×H	30 × 42 × 24 in
Certifications	

One year warranty on the entire unit, PARTS NO LABOR
