

Indoor Air Quality

RESIDENTIAL AIR FILTRATION SYSTEMS

Source 1 Electronic Air Cleaners

The S1-TEAC1625 and S1-TEAC2025 Electronic Air Cleaners use a high-voltage ionizer within the air cleaner that electrically charges airborne pollutants and particles. It also features electrostatic precipitators - a series of metal collection plates that are oppositely charged to the ionized particles. The negative filter plate attracts and captures these microscopic particles, preventing them from being recirculated in the home. Lastly, these electronic air cleaners offer high performance and efficiency, ultra-quiet operation and no filters to replace.

Features:

- The strongest, most reliable power supply and the sturdiest cell in the industry (recognized by dealers nationwide).
- Forever Filter® never needs replacing – just clean and reuse.
- Connects directly to all types of heating and cooling systems.
- Permanent, washable aluminum collection cells deliver longer service life and are easy to clean.
- Greater overall HVAC system efficiency because units keep cooling coils clean.
- Electronic Airflow Sensor: Automatically senses air movement within the duct, resulting in reduced power usage.
- Built-In Internal Fuse: Protects the 24v transformer in the event of a power supply failure.
- All units are UL/C-UL Listed and are easily converted to 240v.
- Rugged cabinet construction for long life.
- Optional Charcoal After-Filter reduces common household odors.

Premium Hybrid Media/Electronic Air Cleaners

Features:

- Whole home electronic air cleaner utilizes both the electrostatic attraction and filter media to provide a more consistent, higher level of performance.
- Equivalent to MERV16 efficiency
- System matching appearance
- When new:
 - 97.8% effective at removing particles from 3-10 microns
 - 95.7% effective at removing particles from 1-3 microns
 - 92.0% effective at removing particles from 0.3-1.0 microns
- Rated to 2000CFM
- Support up to 400 lbs
- Low airflow resistance:
 - 0.10" w.g. @1000 cfm
 - 0.29" w.g. @ 2000 cfm
- Easy maintenance:
- Replace filter media once per year.
 - No washing of cells required; only wiping down of ionizing wires
- Power usage does not exceed 60 watts
- UL Listed
- Silent operation; no snapping from the electronic charge of particles

RESIDENTIAL AIR FILTRATION SYSTEMS

Source 1 High Efficiency Right Angle Media Air Cleaners

The Right Angle Air Cleaner uses a combination of four filtering principles including impingement, interception, diffusion and straining. Its high performance, non-woven, reinforced media captures a wide range of airborne particulate matter. Most pleated air filters capture pollutants primarily by surface loading. This can restrict airflow through your comfort system and result in higher heating and cooling costs. The S1-TRAC2000 grasps contaminants much like a sponge. Its radial pleating and state of the art fiber design provides maximum dust holding capacity.

Features:

- Quick and Easy Installation.
- Filters capture and hold pollutants inside the filter, allowing air to freely through the system.
- High efficiency MERV 11 filter, electrostatically-charged synthetic material, provides superior efficiency with minimal added pressure drop.
- Designed for installations that require a 90° duct adapter.
- Mounts directly to heating and cooling systems.
- Suitable for use with all types of central forced-air configurations.
- Space saving design is ideal for basement applications.
- Rugged cabinet construction for long life.
- Rated Airflow of up to 2000 CFM.
- Tested in accordance with ANSI/ASHRAE 52.2-2007
- Efficiency rating of MERV 11.
- Recommended Media Replacement: S1-KF-102-718-201

Source 1 High Efficiency Expandable Media Air Cleaners

Features:

- The whole home media air cleaner permanently traps particles, including airborne contaminants, down to 1 micron (1 millionth of a meter) in size. Particles of less than 6 microns are invisible to the naked eye, and allergy-causing particles and mold spores range from 0.5 microns to 1 micron.
- Helps minimize the risk of asthma and allergy attacks
- Up to 2 year filter media life
- Low static pressure drop
- MERV 10 or MERV 13 efficiency rating
- 5-year limited warranty

ClenAir HVAC Carbon Block

The HVAC Carbon Block can be added to any ducted HVAC System to immediately remove odor and provide cleaner, healthier air to any indoor environment. Using a unique combination of carbon and minerals, the HVAC Carbon Block absorbs many odors and harmful chemical pollutants found in the air inside homes, offices, and other buildings. Simply install the HVAC Carbon Block in the air handler against the outlet side of the existing air filter. A percentage of the system air will pass through the HVAC Carbon Block and over time, all of the system air will be filtered by the HVAC Carbon Block.

HVAC Carbon Block removes many indoor air pollutants including: animal odors, food odors, ozone, tobacco smoke, formaldehyde, body odors, paint fumes, auto exhaust, sewer gases, burnt odors, cleaning chemicals, chlorine, turpentine, cosmetics, mercaptans, ammonia, solvents, alcohol, acetone, printer gases, VOC's, smog, mildew, and hospital odors.
